Make it Snappy[®] Tools

Premium Power Tool Accessories
Proudly Made in the USA

About Us

Founded in a basement machine shop in Minnesota in 1962, we are a family-owned company, currently operating in Texas. We manufacture premium drilling accessories for use in power drills, impact drivers and drill presses.

The 1/4" hex power bit shank found on most of our tools has become an industry standard, being accepted in quick change chucks and impact drivers everywhere. Our namesake is the "snap" that's heard when a drill bit, driver bit or other tool is pushed into our patented quick change chuck. By utilizing the quick change system, craftsmen and hobbyists can transition from pre-drilling to driving quickly and easily.

As a 3rd generation family business, we take great pride in each product we provide. By using superior materials, cutting-edge machinery and patented technology, we deliver industrial quality tools at an affordable price, "Proudly Made in the USA".

Ironman Drill
Bit Adapters

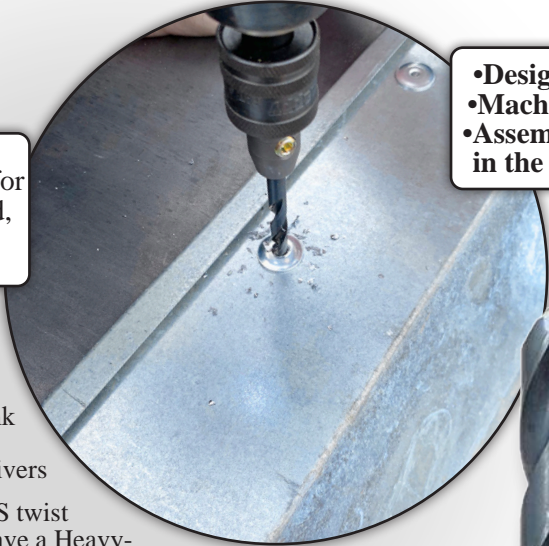

IRONMAN

DRILL BIT ADAPTERS

Fast penetration Ideal for
“punch drilling” in hard,
tough sheet metal

•Designed•
•Machined•
•Assembled•
in the USA

- Precision machined 1/4” hex shank adapter for use with 3-jaw chucks, quick change chucks, or impact drivers
- Sturdy, screw machine length HSS twist drills are **Made in the USA** and have a Heavy-Duty surface treatment for increased wear resistance and edge toughness
- 135° split point resists walking for accurately located holes

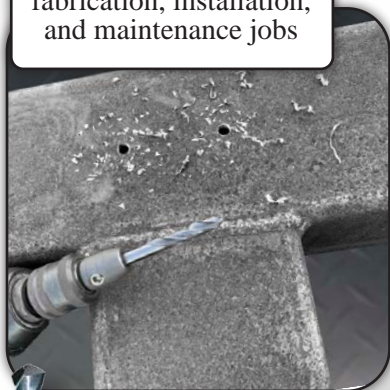

Ironman Drill Bit Adapters	Part #	Description	List Price
	42206	3/32” Ironman Drill Adapter with HD Twist Drill	\$10.99
	42208	1/8” Ironman Drill Adapter with HD Twist Drill	\$10.99

† 1/4" Reduced shank

Gold Screw Countersinks

- Drill the pilot hole and countersink or counterbore for screws in one easy step. Countersink to drive the head of the screw flush with or slightly below the surface
- The 82° countersink angle matches the angle on the head of most wood screws. Easily control depth using an optional stop collar
- Made of thru-hardened steel for long cutting life
- Our signature gold set screw will securely hold the twist drill. Easily adjust the pilot depth or replace a dull bit by simply loosening the large, hardened set screw

•Designed•
•Machined•
•Assembled
in the USA

SD-3 Flat Bottom Counterbores

- Drill a pilot hole or clearance hole and counterbore a flat bottomed hole in one step
- Great for lag screws, lag bolts, washer head screws, T-nuts & more
- TiN (Titanium Nitride) coated twist drill offers superior wear resistance
- Made of thru-hardened alloy steel for long cutting life
- Precision machined with integrated 1/4" hex shank
- The unique geometry of the cutters provide excellent chip clearance and cutting performance, even in hardwoods

- Use **Snappy™** tapered plug cutters to cut your own plugs to conceal screws and other fasteners. Use scraps to match wood grain, making the plug nearly invisible or, for a decorative look, use a contrasting wood
- **Snappy™** plug cutters produce a tapered plug, so you get a tight fit with no glue needed. The chamfered nose makes it easy to get the plug started into the bore
- Updated design featuring radial relief on the inside diameter of the cutter for reduced drag and improved performance. Precision-milled cutting edges and outer reliefs ensure a smooth, clean cut for a consistent, tight-fitting plug
- Thru Hardened to provide excellent wear resistance and a long cutting life
- Always cut to the full depth of the cutter until a radius or chamfer can be seen, clearing chips as needed

•Designed•
•Machined•
in the USA

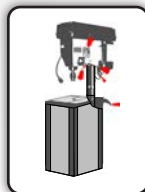

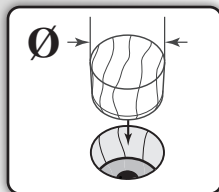

**3 Pc. Set
Part # 43300**

- Insert chamfered end first and drive the plug into bore. Trim excess flush with surface using a chisel or flush cutting saw and finish sand

- The plug remains in the board and can be broken out with a screwdriver or can be sawed to free the plug

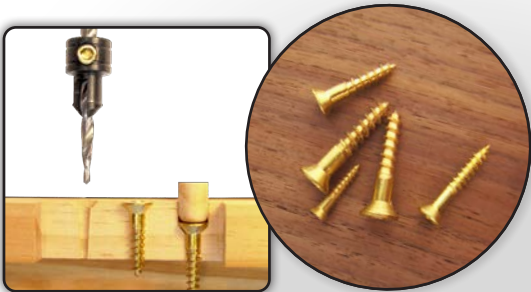

- For use in drill press only, with board clamped to table

Tapered Drill Countersinks

- Drill a pilot hole and countersink or counterbore for tapered wood screws in one step
- Use for tapered screws or as a clearance hole for straight screws
- Made of thru-hardened alloy steel for long cutting life
- Precision machined to work with **Snappy™** quick change chucks or any tool designed to accept a 1/4" hex shank
- Two large hardened set screws securely hold the countersink to the tapered drill to prevent slippage

3 Pc. Set
Part # 44300

- Countersink to keep screw heads flush with or slightly below the surface
- Counterbore to drive screw below the surface and plug the hole

Quick Change Chucks

- Our patented **Snappy™** quick change chuck allows fast changes between drilling & driving
- Accepts all tools with a 1/4" hex power bit shank
- Durable all steel construction, heat-treated for excellent wear resistance and strength
- Simply pushing the bit in will lock it firmly into the drive channel with a hardened chrome ball bearing
- Quickly remove the bit by pulling back the knurled sleeve

•Designed•
•Machined•

Self-Centering Hinge Bits & Shelf Pin Drill Guides

- Use self-centering hinge bits to accurately drill pilot holes in hinges, handles, drawer slides and other hardware
- Ensures screws will be straight and flush for proper mounting of hardware
- Use **Snappy™** shelf pin drill guides to drill holes for shelf pins
- The knurled barrel easily unscrews to clean out chips that may get into the tool's body
- Precision machined to work with **Snappy™** quick change chucks or any tool designed to accept a 1/4" hex shank
